

## Don't know your ring size? Help is here!

**1. PRINT THIS PAGE.** Make sure the page scaling in your print dialog box is set to "do not scale".

**2. CONFIRM.** Measure this bar: 

It must be exactly 2" long. If it is not 2" long, return to step one.

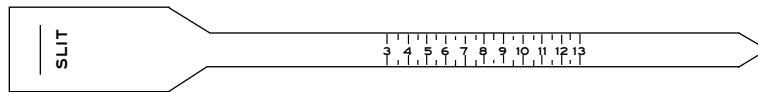

**3. CUT IT OUT.** Carefully cut along the outline of the ring sizer.

**4. CUT A SLIT.** On the line labeled "slit".

**5. WRAP IT AROUND.** Wrap the sizer around your finger, push the tab through the slit and pull until it's snug. The number that lines up with the slit is your ring size.

**6. THINGS TO CONSIDER:**

- A very wide ring may need to be a half or full size larger to fit on your finger.
- Some knuckles are bigger than others. Use your judgment on whether you'll need a larger size.
- Fingers are smaller when they're cold, and bigger when they're warm.

---

**OR, MEASURE A RING YOU ALREADY OWN.** Place the ring over the circles below, matching the inside edge of the ring to the circle nearest in size. If a ring is between two sizes, order the larger size.
